

Scope of Knowledge for Advanced Training in Paediatric Surgery MedEx

The entrance examination consists of 40 Single Best Answer questions.

The duration of the examination is 1 hour 30 minutes or 90 minutes.

The examination will cover topics on:

1. Basic sciences: embryology, anatomy, applied physiology and surgical pathology.
2. Principles of General Surgery.
3. Common paediatric surgical conditions.

A first-year-medical officer in paediatric surgery with experience at managing neonatal and paediatric surgical patients will be able to answer the questions comfortably.
